➢ Position title	***Support Engineer***
➢ Overview	I was working in a support project for a renowened client of Manufactring.TOYOTA was having multiple applications that we had to support on a daily basis and work on all the service requests that we used to get.
➢ Technologies used	CSS3, HTML 5 ,Core Java
➢ Roles and Responsibilities	✓ I had to support the daily trails of most of the applications and resolve all the issues within SLA that used to come during the trails. Interacting directly to the business users to gather requirement and report progress.
	✓ We had to ensure that best practices are applied as well as meeting client's security and application development standards.
	✓ We used to get SR(SERVICE REQUEST) and PBI(Problem Investigation) and PKE(Problem Know error) from client and used to work and deliver those.
	✓ All the SRs that I have mostly worked on are changes at UI level.
	✓ For example, to add some color to the error
	✓ messages, to add a reset button or to shift the position of the buttoin etc etc.

➢ Position title	***System Engineer***
➢ Overview	Dealer Front End Application Development Rewriting and Enhancing the entire User experience of an existing application with all the latest technologies. Striving to provide not only a classy and latest UI for the application to the user also to reduce the number of clicks and other time factors.
➢ Technologies used	Angular 2, CSS3, HTML 5 ,Bootstrap
➢ Roles and Responsibilities	✓ Analyzing requirements and Developing application as per the requirements.
	✓ Interacting directly to the business users to gather requirement and report progress.
	✓ Support the system testing and defect fixing.
	✓ Ensure that best practices are applied as well as meeting Client's security and application development standards.
	✓ Reporting via regular client calls and proactively suggest
	✓ process changes to enhance efficiency.

React Developer
Integra Micro Systems - Bengaluru, Karnataka –

Presently working as UI developer for one project (scheduler) in the company.Developed reusable React components to support internal framework which helps developers build UI for the range of products. Introduced better NodeJS-powered workflow involving modern frontend architecture involving React, Redux and build system involving gulp, webpack, Styled Components and other tools. Collaborate with backend developers on intergration.
