2011	Kristu Jyoti College of Management & Technology, Changanacherry	BSc. Computer Science	60

## Academic Projects

### ➤ E-Banking – Main Project (MCA)

Front End: ASP.NET Back End: SQL2005

**Duration** 3 Months

The project named “E-banking” is a website for account holders of a bank. The website provides functions for the administrator, registered users and guest users. This system has mainly three phases. They are administrator side, the registered user side, and the guest user side. The main work will be done in the administrator side; still the user side is equally important because it deals with what is seen and available to a visitor of the site when he/she enters the site.

### ➤ Biometric Secure Medifile – Mini Project (MCA)

Front End: ASP.NET Back End: SQL Server 2008

**Duration** 3 Months

Biometric Secured global medi-file is a unique system where both Multi organizational and Bio-Metric utilities are made full use. In this project, multi specialist hospitals can store, retrieve their patient details. Patient details contain a global identification number and a thumb impression. If a patient admitted in a hospital with seriously injury , using his thumb impression or GIN doctors can find out about his previous case history like his allergy towards certain drugs , heart Conditions, Hematology detailed , previous surgery details if any etc.. So treatment will be more efficient and precious. This globalized technology also is localized hence the true potentials of Multitier programming is fully utilized.
